

Tefen's Solution for Mobile Disinfection and Hygiene

Tefen is a leading manufacturer of environmentally friendly, non-electric volumetric equipment and flow products. Since 1973.

Tefen's **MixRite** line of water-driven proportional dosing pumps are used to ensure precise additive injection directly into the water or fluid line, with various flow rates, feed ratios and pressure ranges.

Advantages

- ✓ Hydraulic, volumetric and non-electric.
- ✓ Dosing proportional to water flow rate.
- ✓ Excellent dosing repeatability and homogeneity.
- ✓ Simple dosing adjustment.
- ✓ Easy to install, operate and maintain.

Features

- ✓ Precise water-additives ratio
- ✓ Fast and simple dosing proportion adjustment

Manually set dosing proportions by rotating the sleeve to the desired proportion.

The amount of additives injected are proportional to the amount of water that flows through the MixRite pump, according to the adjusted percentage.

Flow rate: 20-3,500 liter
Dosing rate: 0.1%-10%

- 1 20-30 liter disinfection tank
- 2 Convenient mobile cart
- 3 Check valve
- 4 3.4" filter
- 5 Spray gun
